

# OPTIONS

## Head Mount Options

The Avidia System is available in a Rack Mount configuration, providing bed or overhead head mounting. All the features of the pedestal configuration are carried over, including the dual functionality of the Head and Small Monitor. Injections can be initiated from the Small Monitor, the optional scanner interface, the optional footswitch or a combination of all.

## Height-Adjustable Arm Pedestal Option

The Avidia Pedestal System is available with a height adjustable arm for improved patient access. Featuring hydraulic assistance and one handed locking, the Avidia Pedestal is now even more versatile.

## Imaging Scanner Interface (ISI) Pedestal Option

Validated Imaging Scanner Interface (ISI) software is available in all Avidia configurations.
